Wildside Blender Jugs & Lids

The Blendtec Wildside jugs and lids must be used as part of our allergen management procedures to separate dairy and non-dairy products when preparing iced/blended beverages.

The colour coding on the blender jugs and lids also corresponds to the colour coded handles used for steaming dairy and non dairy products as well as the colour coded clothes used when purging the steam arm.

The Wildside Jugs can be ordered from Bunzl Lockhart, full details can be found on the following page.

For further details regarding allergen management please refer to xxxxx.

NB. All costs are based upon MKT1 price file
